

“It’s a pleasure working with CRA. I can depend on your staff for quality of work.”

- 2009 client/agent satisfaction survey

Our expert team is ready to take on your cultural resource challenges.

In business for more than 25 years, Cultural Resource Analysts will provide you with high quality archaeological studies for new surface and deep mines, amendments, and incidental boundary revisions. CRA is committed to working for the coal industry and offers efficient solutions for permitting requirements.

- Extensive experience working with state and federal agencies
- OSHA and MSHA compliant with an impeccable record
- Fully equipped to navigate the rough terrain of the coal fields
- Technologically advanced to provide efficient and exacting analysis and reporting
- Regional offices across the country and a cultural resource management team with more than 600 total years of experience
