

**“The CRA staff with whom I have worked understand the challenges of renewable energy wind projects and provide creative approaches to meet these challenges.”**

Christine Roberts  
CH2M Hill

**Our expert team is ready to take on your cultural resource challenges.**

Cultural Resource Analysts has completed cultural resource investigations for wind farm projects all across the United States. Each project tends to have their own set of unique conditions dependant upon client needs and regulatory variability among states. CRA tailors our approach to fit client expectations and concerns.

- Extensive experience with state and federal agencies
- Design fieldwork to identify red flags within proposed APE where only due diligence is required
- Archival research, historic map consultation, and site file searches
- Impeccable safety record
- Archaeological survey, historic structure identification and evaluations, and view shed analysis of above ground resources
- Regional offices across the country to meet your needs
